Diaphragm Pump

AIR VALVE for
VC AODD series pumps

VC series

AIR VALVE ASSEMBLY

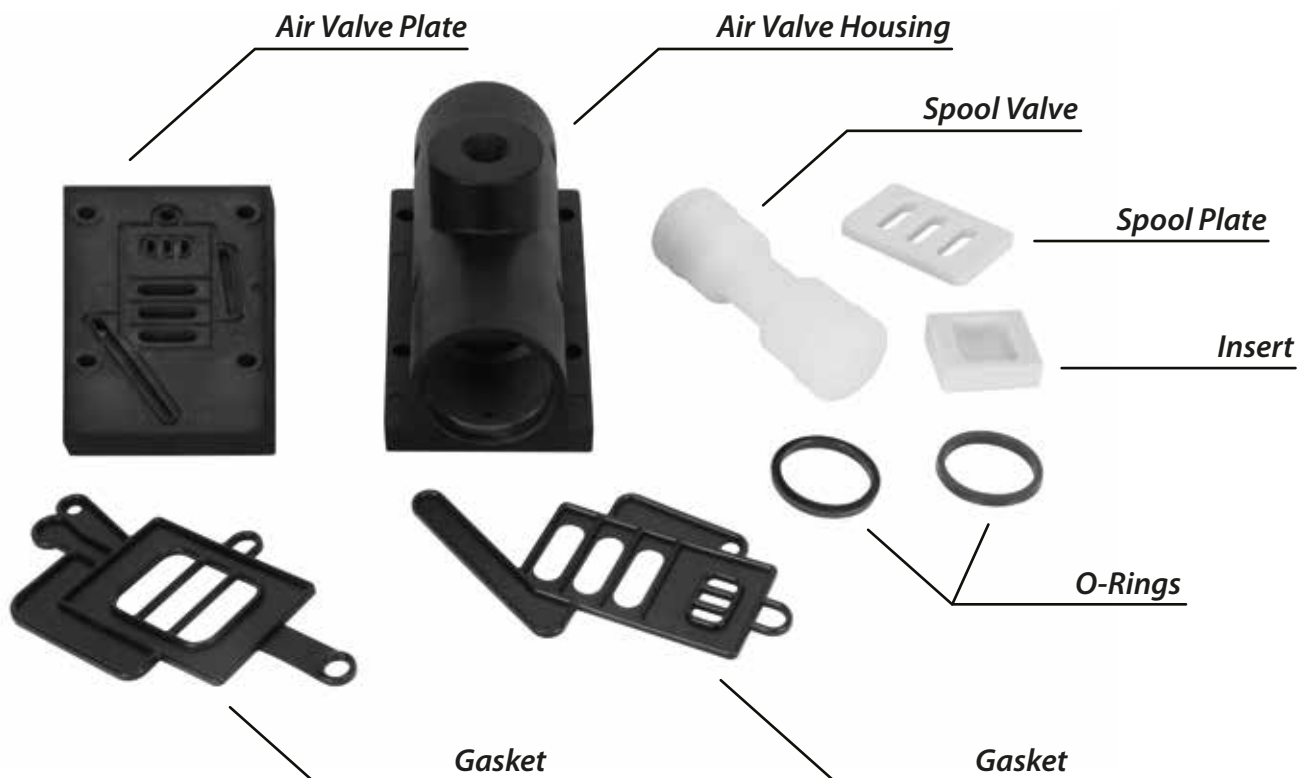

A brand of Asco Pompe
Diaphragm Pumps

The most effective air valve on the market!

The air operated double diaphragm pumps of the VALISI VC series feature the best type of valve on the market: simple, silent, with very little friction and almost no need for maintenance.

Low friction components allow the pump to use very little air for reversing diaphragm thrust, granting both high efficiency and low noise compared to other products on the market.

Construction materials

Spool valve:	Polyoxymethylene (POM) or acetalic resin
Spool plate and insert:	Ceramics
Air valve housing and plate:	Aluminum alloy
O-rings and gaskets:	NBR (Buna)
